Annual Research Conference

As part of our journey towards excellence, the IRB Office hosted the 7th annual Research Conference on Friday, Oct. 20.

This conference ensured that our team members are up-to-date on the latest regulatory guidance and best research practices and that Adventist HealthCare is on the cutting edge of clinical knowledge and practice.

Community members, including colleagues from INOVA Health System, also attended the conference to learn how to effectively prepare for FDA inspections, what to expect due to revised federal regulations, and how to collaborate with the FDA to facilitate future research.

To cap off the event, two research participants spoke about their experiences at Adventist HealthCare.

Please contact the IRB Office for more information or to obtain copies of the presentations.
